

**March 5 – Shelter Medicine**  
**2:00 pm – 3:45 pm**

**Canine Distemper – Why is it on the Rise?**

It seems like canine distemper is popping up everywhere. Is it really? Was it always there and are we now concentrating the virus in our animal care facilities? Is there a new strain? If new strains are popping up, what can we do about it? Are there treatment options? What about sanitation and titer testing? What strategic options are available? How much is all of this going to cost? Attend this session and get answers!
